PUMP GUARD ADVISOR CONTROL PANEL

Available on ALL of the
Con-Serv Package Water Recovery Product Lines
and Optional on Series II and other Con-Serv Systems

- ✓ The **Pump Guard Advisor** will keep track of the hours of in service operation for the entire system and notify you by a Visual Lighted Display Screen.
- ✓ All Pre-Programmed Maintenance functions will be display on the lighted screen located in the center of the Electric Control Panel. The message will be preceded by a visual alert to prompt you to read the screen. The maintenance request will remain on the screen until the task is completed an the reset key is pushed.
- ✓ When the maintenance requests are completed, the screen will revert back to reading hours of operation for both of the **Con-Serv** Systems (Pumping / Filtration and Ozone Injection).
- ✓ The **Pump Guard Advisor** will also monitor water level in the underground tanks; High Level, Low Level, etc. Flow Monitoring will prevent Pump damage in the event of low obstructed water supply, loss of electricity, or air compressor failure.
- ✓ The **Pump Guard Advisor** is PC compatible for remote modem access and monitoring.
